DETAILED ACTION

The following action is in response to application 10/715,033 filed on November 17, 2003.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In Claim 1:

on line 1, "the clutches" has been replaced with --clutches--

on line 1, "the synchronizers" has been replaced with --synchronizers--

on line 6, "the same axis shaft" has been replaced with --a same axis shaft--

Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method of controlling the engagement of clutches and synchronizers of a dual clutch transmission, and particularly including commanding interruption of engine torque to the faulted clutch; commanding neutralization of all synchronizers of a same axis shaft as the faulted clutch, and including the remaining controls of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 3681

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Amedei, Habuchi, and Eich have been cited to show similar transmission controls.
